The Relatable IUL Strategy

Indexed Universal Life (IUL) is a permanent life insurance policy that builds cash value tied to a market index — without direct market risk.

How It Works

1. You pay a monthly premium into your policy.
2. A portion goes toward life insurance protection.
3. The rest grows in a cash value account linked to a market index (like the S&P 500).
4. Your gains are capped, but your losses are floored at 0%.
5. Over time, you build tax-advantaged cash value you can access during your lifetime via policy loans and withdrawals.

Realistic plans designed for real business owners.

High-impact wealth preservation with principal protection against direct market loss.

The Stability Pillars

Three foundational principles that protect your wealth inside an IUL policy.

0% Floor

Principal Lock-In: Annual interest gains are permanently credited and locked every 12 months.

Capital Protection Floor: If the linked stock market index drops, your contract's credited index interest rate stays at 0.00% to protect accumulated cash value from market losses.

Historical Proof: Stayed completely safe through major market corrections in 2001, 2002, 2008, and 2022.

Tax-Advantaged Access

Structured Policy Loans: Access available cash value via standard or index loans generally without generating immediate taxable income.

No IRS Age Penalties: Access policy cash value before age 59½ without the standard IRS 10% early distribution penalty fees associated with traditional retirement accounts.

Built-In Lapse Guard: Optional rider designed to help prevent policy lapse and subsequent tax exposure if long-term loans remain active and funded.

Flexible Premiums

Adjustable Funding: Scale your annual premium deposits up or down to mirror your active business cash flow.

Overfunding Leverage: Max-fund the account under IRS rules to rapidly dilute internal insurance costs.

No-Lapse Protection: Keeps your primary death benefit fully secure as long as minimal baseline targets are met.

Age 35: The $200 Starter

Start small. Grow big. Time is your greatest asset.

Monthly Funding	Total Out-of-Pocket	Est. Cash Value at 65
$200/mo ($2,400/year)	$72,000	~$175,000

Hypothetical illustration based on a non-guaranteed 6% illustrative indexing rate. Values are for educational comparison purposes only. Actual policy cash values are dependent on actual index performance, caps, participation rates, and ongoing monthly deductions for the cost of insurance and policy fees.

Age 40: The $600 Peak

Peak earning years. Maximize your contributions now.

Monthly Funding	Total Out-of-Pocket	Est. Cash Value at 65
$600/mo ($7,200/year)	$180,000	~$295,000

Hypothetical illustration based on a non-guaranteed 6% illustrative indexing rate. Values are for educational comparison purposes only. Actual policy cash values are dependent on actual index performance, caps, participation rates, and ongoing monthly deductions for the cost of insurance and policy fees.

Age 50: The Catch-Up

High-velocity funding can still build meaningful wealth.

Monthly Funding	Total Out-of-Pocket	Est. Cash Value at 65
$1,000/mo ($12,000/year)	$180,000	~$210,000

Hypothetical illustration based on a non-guaranteed 6% illustrative indexing rate. Values are for educational comparison purposes only. Actual policy cash values are dependent on actual index performance, caps, participation rates, and ongoing monthly deductions for the cost of insurance and policy fees.
