Financial Protection When Health Insurance Isn't Enough

- Many people believe their health insurance covers everything. However, even the best health plans often leave members responsible for deductibles, coinsurance, copays, and unexpected expenses. A hospital stay can create financial stress long before the medical bills arrive.
- Hospital Indemnity Insurance is designed to help provide cash benefits directly to you when a covered hospitalization occurs. The goal is simple: Protect your finances while you focus on recovery.

What Is Hospital Indemnity Insurance?

- Supplemental coverage that provides cash benefits upon covered hospitalization — paid directly to you. Use the funds however you choose:
 - • Deductibles & Coinsurance
 - • Copays & Unexpected Medical Expenses
 - • Mortgage & Household Bills
- • Transportation & Childcare Costs
- • Lost Income During Recovery
- "The money can typically be used however you choose" — helping fill the financial gaps your medical insurance leaves behind.

How Does It Work?

Hospital Admission & ICU Benefits

- ✓ Hospital Admission Benefit — \$3,000 paid upon covered admission
- ✓ Intensive Care Benefits — additional daily ICU benefit
- ✓ Observation Benefits — coverage during hospital observation status

Emergency & Outpatient Benefits

- ✓ Emergency Room Benefits — cash benefit for covered ER visits
- ✓ Outpatient Surgery Benefits — benefit paid for covered outpatient procedures
- ✓ Daily Hospital Confinement — \$2,000 per day during covered hospital stay

Total Payout Example

Hospital Admission Benefit: \$3,000 | Daily Benefit: \$2,000/day × 5 Days: \$10,000 | Total Potential Benefit: \$13,000 — paid directly to you, usable for any expense.

Who Should Consider This Coverage?

Protect savings, reduce financial stress, and cover out-of-pocket costs. Hospital Indemnity Insurance provides additional financial flexibility during recovery for anyone concerned about unexpected medical expenses.
