

Protecting Your Family & Building Wealth

Which Strategy Fits Your Financial Goals?

Comparing **Term Life**, **Whole Life**, **Savings Accounts**, **CDs**, and **Indexed Universal Life (IUL)** — so you can choose the right path for your family's future.

Term Life Insurance

Term life provides coverage for a set period — typically 10, 20, or 30 years. If the insured passes away during the term, beneficiaries receive the death benefit. Coverage ends when the policy expires.

✓ Pros

- Lowest monthly premium
- High death benefit
- Great for young families
- Simple and easy to understand

✗ Cons

- Coverage expires at end of term
- No cash value accumulation
- Premiums increase upon renewal
- You may outlive the policy

Term Life by the Numbers

Term life offers strong protection at the lowest cost — but once the term ends, there's no accumulated savings.

Starting Age	Monthly Premium	Total Paid (20 Yrs)	Cash Value After 20 Yrs
35	\$35	\$8,400	\$0
55	\$120	\$28,800	\$0
65	\$350	\$84,000	\$0

 **Key Takeaway:** Term life delivers excellent protection while you need it — but after 20 years, there is typically no accumulated savings.

Whole Life Insurance

Whole life provides permanent coverage with guaranteed cash value growth and fixed premiums — a conservative, stable approach to lifelong protection.

✓ Pros

- Permanent lifetime coverage
- Guaranteed cash value growth
- Fixed premiums that never increase
- Can borrow against cash value

✗ Cons

- Higher monthly premiums
- Less flexibility in premium payments
- Conservative growth rate
- Lower cash accumulation in early years

WHOLE LIFE — HYPOTHETICAL EXAMPLE

Whole Life by the Numbers

Whole life builds guaranteed cash value over time — though at a higher cost than term insurance.

Starting Age	Monthly Premium	Total Paid (20 Yrs)	Estimated Cash Value After 20 Yrs
35	\$450	\$108,000	~\$85,000
55	\$700	\$168,000	~\$120,000
65	\$1,200	\$288,000	~\$180,000

 Illustrative example only. Actual values depend on the carrier, policy design, and dividend performance.

Savings Accounts & CDs

Both are FDIC-insured and safe — but interest is taxable and returns may not keep pace with inflation over time.

■ Total Deposited ■ Value After 20 Yrs

Savings Accounts

- FDIC insured, easy access
- Low interest (~2% annually)
- Taxes on interest earned
- Inflation erodes purchasing power

Certificates of Deposit

- Guaranteed, predictable returns
- FDIC insured
- Limited liquidity before maturity
- Interest is taxable

Based on \$500/month deposits over 20 years.

OPTION 5

Indexed Universal Life (IUL)

An IUL combines permanent life insurance with tax-advantaged cash value growth linked to a market index — with downside protection against negative performance.

✓ Tax-Advantaged Growth

Cash value grows tax-deferred; loans can be accessed tax-free when properly structured.

📈 Market-Linked Potential

Growth tied to an index — with a floor protecting against market losses.

💳 Flexible Premiums

Adjust payments within policy limits to match your changing financial situation.

⚠️ Requires Careful Design

More complex than term — proper funding and structure are essential for performance.

IUL by the Numbers

With consistent funding, an IUL can accumulate significantly more cash value than whole life — while maintaining lifetime protection.

Starting Age	Monthly Premium	Total Paid (20 Yrs)	Hypothetical Cash Value After 20 Yrs
35	\$500	\$120,000	~\$210,000
55	\$500	\$120,000	~\$175,000
65	\$500	\$120,000	~\$145,000

❏ Illustrative only — not guaranteed. Actual performance depends on policy design, carrier charges, index crediting, and other factors.

Side-by-Side Comparison

How each option measures up across the features that matter most.

Feature	Term	Whole Life	Savings	CD	IUL
Death Benefit	✓	✓	✗	✗	✓
Lifetime Coverage	✗	✓	✗	✗	✓
Cash Value	✗	✓	✓	✓	✓
Tax-Advantaged Growth	✗	Limited	✗	✗	✓*
Market Growth Potential	✗	Low	Low	Low	Moderate
Flexible Premiums	✗	✗	✓	✗	✓
Liquidity	✗	Moderate	High	Low	Moderate

*When properly structured and managed, subject to applicable tax laws.

Which Strategy Fits Your Goals?

Term Life

Affordable protection for temporary needs.

Whole Life

Lifetime coverage with conservative cash value growth.

Savings & CDs

Safe, liquid options for short- to medium-term goals.

Indexed Universal Life

Permanent protection plus tax-advantaged cash value for long-term wealth and retirement planning.
