Financial Protection When Health Insurance Isn't Enough

- Many people assume their health insurance covers all medical costs. However, many health plans leave members responsible for deductibles, coinsurance, copays, and out-of-pocket expenses. A hospital stay can create financial strain before final medical bills arrive.
- Hospital Indemnity Insurance is a supplemental policy designed to provide fixed cash benefits directly to you during a covered hospitalization. The goal is simple: Help ease your financial burden while you focus on recovery.

What Is Hospital Indemnity Insurance?

- Supplemental coverage that provides fixed cash benefits upon a covered hospitalization — paid directly to you.
Use the funds to help cover:
 - Deductibles & Coinsurance
 - Copays & Out-of-Pocket Medical Expenses
 - Mortgage & Household Bills
- • Transportation & Childcare Costs
- • Indirect Expenses During Recovery
- Because benefits are paid directly to you, they help fill the out-of-pocket financial gaps your primary medical insurance leaves behind.

How Does It Work?

Hospital Admission & ICU Benefits

- ✓ Hospital Admission Benefit — Fixed benefit paid upon covered admission
- ✓ Intensive Care Benefits — Additional daily benefit for covered ICU stays
- ✓ Observation Benefits — Fixed benefit for covered hospital observation status

Emergency & Outpatient Benefits

- ✓ Emergency Room Benefits — Cash benefit for covered emergency visits
- ✓ Outpatient Surgery Benefits — Fixed benefit paid for covered outpatient procedures
- ✓ Daily Hospital Confinement — Daily benefit during a covered hospital stay

Hypothetical Payout Illustration

Example based on an optional \$3,000 Admission Benefit + \$2,000 Daily Benefit x 5 Days (\$10,000) = Total Illustrative Payout of \$13,000.

*Note: Benefit amounts, riders, and limits vary strictly by the carrier, plan selection, and premium options chosen. Payouts are subject to policy definitions, exclusions, and limitations.

Who Should Consider This Coverage?

Protect savings, reduce financial stress, and cover out-of-pocket costs. Hospital Indemnity Insurance provides additional financial flexibility during recovery for anyone concerned about unexpected medical expenses.
